

Google Chrome is Google’s brand of web or internet browser. A browser is the program you use to access or open the Internet. There are many advantages to using Google Chrome, especially since the district utilizes Google Apps for Education for an email/productivity suite.

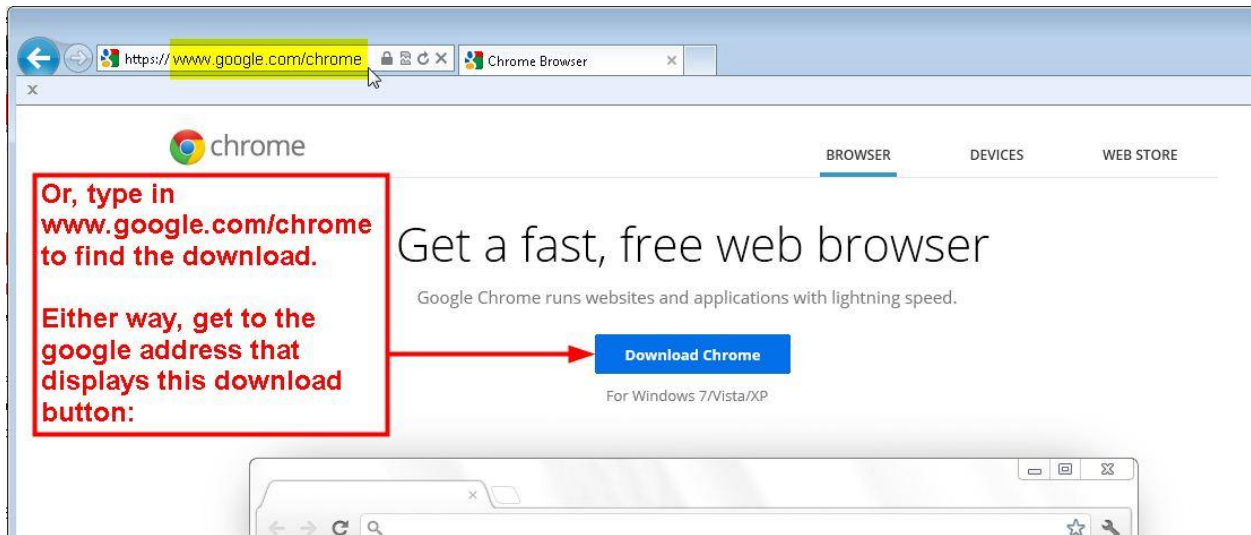

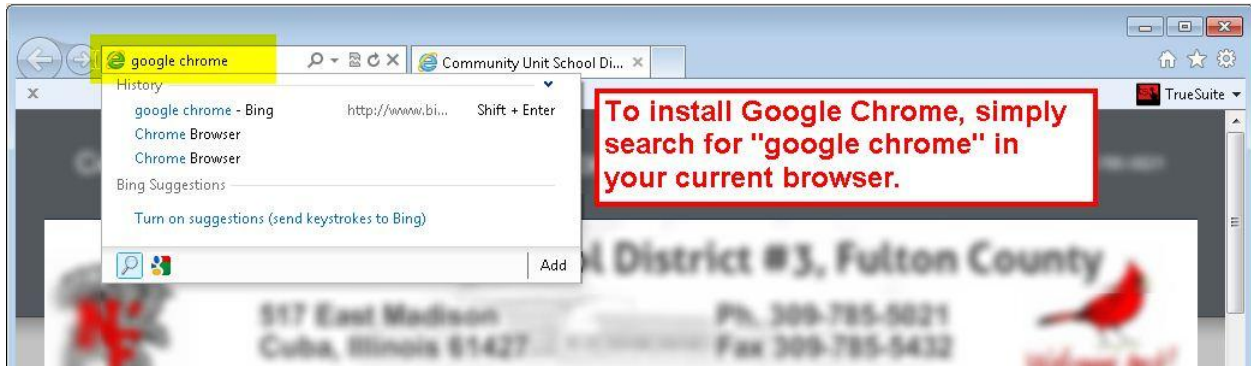

Using Google Chrome will allow you to use features that other browsers do not offer, such as “drag and drop” and desktop notifications. Not to mention its quick speeds and better viewing of many websites such as the www.cusd3.net website.

Find & Download

Install

Now, the program will download, and begin to install. You will see a window that tracks the progress of the download/install similar to these:

At the bottom of your computer screen, in the taskbar, you will see the installer icon:

When this shield icon appears in the taskbar, click it so another window will appear:

Choose to continue with the installation, and in a short time, Google Chrome will be installed and automatically open on your screen:

Welcome to Chrome

Sign in to get your bookmarks, history, and settings on all your devices. [Learn more](#)

This prompt will appear when Google Chrome has completed its installation.

Do not sync your information with Chrome, it is not necessary.

To create a new bookmark, locate the icon that precedes the web address.

Click it, hold, and drag it to the bar just below that address window. You will see a special cursor when done correctly.

Be sure to drag it to an empty place on the bar. This is important once you have already added a few bookmarks.
